BUILDING CODES (check for the actual plot)
• Cabinet Regulation No. 529 «Building regulations» (amended from 01.08.2025): an auxiliary building with a built-up area up to 25 m² («maz ēka») needs no construction documents outside towns; in a town — on a plot with a one- or two-dwelling house; except cultural monument territories. Local building rules and protection zones apply.
• LBN 201-15 «Fire safety of structures» p. 29: 5 m from a U3 (timber) building to the neighbouring plot boundary.
• Foundation below the frost depth (≈ 1.2 m from the ground in Latvia, LBN 207-15; confirm by site investigation).
• Snow sk = 2.0 kN/m² (LVS EN 1991-1-3/NA, confirm for the site) — BK-1.
• Natural ventilation: supply low, exhaust high, each ≥ 1 air change per hour (project rule; LBN 231-15 sets none for a utility building) — AVK-1.
• LBN 261-15 / LVS HD 60364: 30 mA residual current protection for sockets and outdoor luminaires — EL-1.
